

THUNDER BEAST ARMS CORPORATION

MODEL 22S/L-1 SUPPRESSORS

The model 22S-1 is a thread-attach suppressor for rifles and pistols chambered in .22 rimfire. At only 4.9 inches in length by 1.0 inch in diameter, it provides good sound suppression in a very small package. It is ideal for suppressed .22 pistols or compact rifles.

The “long” model 22L-1 is 6.2 inches long, or approx 1.3 inches longer than the model 22S-1, and provides increased sound suppression at the expense of a larger package. It is the ideal solution for .22 Magnum (WMR).

Titanium construction provides strength and durability over aluminum rimfire suppressors. Report is drastically reduced, and almost completely abated when using subsonic ammunition. Perfect for pest control or just plinking. The suppressor is sealed and requires no maintenance.

Caliber	.22 LR (.22 WMR and .17 HMR OK)
Material	Titanium
Dimensions	Short - 4.9"[Length] x 1.0"[Diameter] 3.2oz Long - 6.2"[Length] x 1.0"[Diameter] 4.1oz
